***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 1-26 and 59 drawn to light-emitting device with first layer having dielectric function that varies spatially as a pattern, and at least 45% of a total amount of light generated by the light-generation region that emerges from the light-emitting device emerge via the surface of the light-emitting device

Species II: Claims 27-56 and 60 drawn to a light-emitting device having an edge of about 1 millimeter long and the light-emitting device is designed so that an extraction efficiency of the light-emitting device is substantially independent of the length of the edge of the length of the edge.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is held generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant's election without traverse of claims 1-56, 59 and 60 in the reply filed on February 1, 2005 is acknowledged.

A telephone call was made to Sean P Daly on April 21, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn Zimmerman whose telephone number is (571) 272-2466. The examiner can normally be reached on M-W 8-5.
